

ADVANTAGES

- Different sizes available
- ATEX-certified & NFPA compliant models available
- High-pressure fans for usage on HV-applications
- Individually adaptable to process requirements.
- Energy-efficient

Installation Options

- Depending on the process and the customer needs, dust collector fans are available as top mount or floor mount versions and can be combined with further accessories such as silencer and vibration isolation.
- To be used in all dry dust collectors or coolant mist separators.

Comment

To ensure an energy efficient and reliable performance of the dust extraction system, the fans have to be sized to the specific application and usage.
